European Journal of Operational Research 57 (1992) 429–430
North-Holland

Contents Volume 57

1 Optimization aspects of deadlock prevention in packet-switching networks (*Invited Review*)
J. Błażewicz, J. Brzeziński and G. Gambosi
13 A test on a priori financial characteristics of the firm
A.J. Kanto and T. Martikainen
24 Expert opinion in project management
B. Bhola, R.M. Cooke, H.G. Blaauw and M. Kok
32 A practical heuristic for a large scale vehicle routing problem
A. Raghavendra, T.S. Krishnakumar, R. Muralidhar, D. Sarvanan and B.G. Raghavendra
39 Generating statistically dependent pairs of random variables: A marginal distribution approach
R.A. Grimlund
54 A distribution multi-echelon lot-size model
M.F. Friedman
71 A deterministic inventory model for deteriorating items with two warehouses and finite replenishment rate
T.P.M. Pakkala and K.K. Achary
77 All-units quantity-freight discounts with disposals
F.J. Arcelus and J.E. Rowcroft
89 A usage dependent model for warranty costing
D.N.P. Murthy
100 Replacement policies of a shock model with imperfect preventive maintenance
M. Kijima and T. Nakagawa
111 A multi-stage parallel-processor flowshop problem with minimum flowtime
C. Rajendran and D. Chaudhuri
123 A pseudo-polynomial algorithm for detecting minimum weighted length paths in a network
C.E. Yang, L.R. Foulds and J.L. Scott
132 OR Software
ORSEP – Operations Research Software Exchange Program, *H.W. Hamacher (ed.)*

Special Issue on Facility Layout

135 Editorial
S.S. Heragu
136 Recent models and techniques for solving the layout problem
S.S. Heragu
145 Flow network design for manufacturing systems layout
D. Chhajed, B. Montreuil and T.J. Lowe
162 Integrating facility layout with process selection and capacity planning
R.G. Askin and M.G. Mitwasi
174 A nonlinear optimization approach for solving facility layout problems
D.J. van Camp, M.W. Carter and A. Vannelli
190 Experimental analysis of simulated annealing based algorithms for the layout problem
S.S. Heragu and A.S. Alfa
203 Simulated annealing for machine layout problems in the presence of zoning constraints
P. Kouvelis, W.-C. Chiang and J. Fitzsimmons
224 Layout design for flexible manufacturing systems
B.K. Kaku and R. Rachamadugu
231 A multiattribute decision-theoretic approach for the layout design problem
S.C. Sarin, P. Loharjun, C.J. Malmborg and B. Krishnakumar
243 A graph-theoretic heuristic for designing loop-layout manufacturing systems
J. Leung
253 A distance assignment approach to the facility layout problem
M.J. Rosenblatt and B. Golany
271 Computational performance and efficiency of lower-bound procedures for the dynamic facility layout problem
T.L. Urban

280 Solutions for the constrained dynamic facility layout problem
J. Balakrishnan, F.R. Jacobs and M.A. Venkataramanan
287 Performance evaluation of cellular flexible manufacturing systems: A decomposition approach
R. Ram and N. Viswanadham

305 Simulation in 1991 – Ten years on (*Invited Review*)
J.G. Crookes
309 Meeting seasonal demand in a dynamic production environment
D.C. Myers
316 Vehicle crew scheduling to complete specific tasks and bulk-tasks at depots
J.A. Ferland and S. Taillefer
323 Optimal due-date assignment and sequencing
P. De, J.B. Ghosh and C.E. Wells
332 Solving sequential interval cutting problems via dynamic programming
K. Richter
339 The history of the application of mathematical programming to menu planning
L.M. Lancaster
348 Task scheduling with interprocessor communication delays
P. Chrétienne
355 Lexicographic optimality in the multiple objective linear programming: The nucleolar solution
E. Marchi and J.A. Oviedo
360 Optimality and duality for multiobjective nonsmooth programming
D. Bhatia and S. Aggarwal
368 Generalized hyperplane methods for characterizing Λ-extreme points and trade-off rates for multiobjective optimization problems
M. Sakawa and H. Yano
381 Multiple-objective programming with polynomial objectives and constraints
M.M. Kostreva, T.J. Ordoyne and M. Wiecek
395 Gauss–Seidel–Newton–Armijo approach for minimization problems on the non-negative orthant; Application to spatial price equilibrium problems
J.-P. Crouzeix, J.A. Ferland and L. Zubieta
409 A note on weakly active constraints in connection with nonconvex quadratic programming
P.F. Körner
412 A purification algorithm for semi-infinite programming
T. Leon and E. Vercher
421 A Markovian process in interactive multiobjective decision-making
C.G. Tapia and B.A. Murtagh
